

OLON®

Over 45 Years of North American Manufacturing

IT ALL COMES TOGETHER

FACE FRAME MOULDINGS

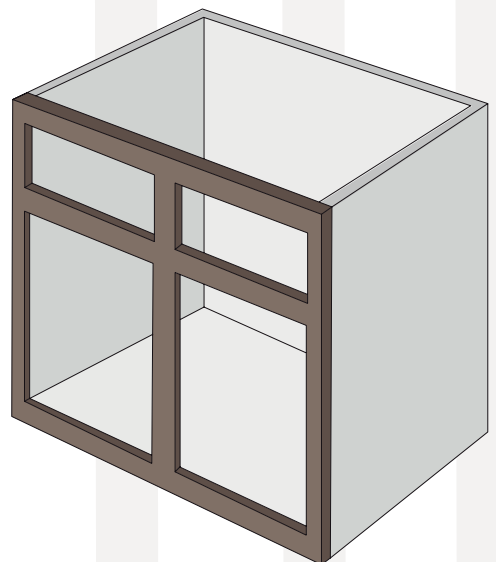

Wrapped face frame lineals are mouldings that can be assembled into a frame and then added onto the front of a kitchen cabinet to create a framed cabinet.

Face frames wrapped using decorative laminates elevate the beauty and design of traditional American craftsmanship with limitless choices of woodgrain, solid colour painted effects and more, without the backlog of a paint shop. No more sanding, staining or painting. All components are finished and ready for cutting and assembly.

Choose from our decorative laminate collections or use your own custom colour.

FACE FRAME MOULDINGS

Designed & Manufactured
in North America

MOULDING SPECIFICATIONS

- Mouldings are 8' long wrapped poplar.
- All mouldings have Zero radius corners, the only radius is created by the wrap material.
- All mouldings are rectangular with wrap finishing on back side. Customers will be able to add their own grooves as per their production needs.
- All mouldings are packed bulk in crates.
